

SURPRISE VISIT & INSPECTION OF SCHOOLS

In the back drop of the beginning of the academic sessions of the year and in order to have a first hand knowledge on the functioning of government run schools, the Deputy Commissioner Rinchin Tashi accompanied by DDSE B.N.Lendo, SSA Co-ordinator D.W.Kharma and ADEO (Academic) N.G.Bapu paid a surprise visit to all the schools in the district headquarter and its peripheral areas today.

Committed to improve the quality of education in the district and to make the presence of administration felt, DC Tashi and the team thoroughly checked the attendance register and leave account of the teachers as some teachers were found absent without any official authorization. Taking strong exception of the lackadaisical attitude of some of the teachers willfully remaining absent; the Deputy Commissioner in his interaction with the teachers in all the schools visited, underscored the need for punctuality, dedication and hard work on the part of the teaching community so as to do justice to the profession and expectations of the parents and society as a whole. Re-dedicate yourself to the noble profession and endeavour to set an example for others to follow, the DC exhorted. Concerned over the sorry state of affairs in a particular school visited this morning, DC Rinchin Tashi, without mincing any words directed the Institutional heads to exercise their administrative power in right earnest without fear, favour and partiality. Well concerned with the ways the youngsters behave and adopt means and ways to fulfill their desires in this present era, the Deputy Commissioner advised the teachers to go for moral teachings besides the normal text book teachings so as to inculcate high moral values and to show the righteous path to the young and upcoming generations.

The statistical data collected during the surprise visit revealed that the number of teachers in the district headquarter far exceeded the teacher student ratio as ordained by the government. Considering the claims of the people of the outposts and far-flung areas for posting of teachers, the DC made it public that administrative measures would be taken for transfer and posting of teachers to those areas from the schools located in the district headquarter where the ratio of teachers exceed and those found irregular and unfaithful to their profession keeping in view the future of the students in the district. The second phase would see the Deputy Commissioner and officers of the educational department visiting the schools located in the outposts and far-flung areas of the district.
